

Stationary Top with Mobile Base

MOBILE FLIP-TOP

BASE SPECIFICATIONS

CARLIN BASE

Base is made of 1.25", 14 gauge round tubular steel. Base spread is 16", 22" or 26" T spread, depending on size of tabletop. Base is formed on automated tube bender for maximum consistency and quality. Column made of 1-1/2" x 3", 11 gauge OVAL tubular steel and notched to accept base plate. Top plate is 8" x 8" or 11" x 11" stamped steel, depending on size of tabletop. Carlin "T" base is a completely welded one piece base, no tie-rod assembly. The top plate is welded to the vertical column and the vertical column is welded to the horizontal base plate. Base mounts to tabletop with 1/4-20 x 1" machine screws into metal inserts in top; no wood screws are used. Stretcher steel bars are used on tops over 72" long for maximum support to prevent bowing or warping. Factory installed specialty adjustable & self-leveling zinc rubber cushion steel glides are standard. **These specialty glides allow the table leveling on the most uneven of floors.**

FLIP TOP MECHANISM: These table tops can be "flipped up" in the horizontal position, pushed together and nested against the wall for storage. On flip-top models, lightweight designer-styled mechanism offers soft visual aesthetics ("non-industrial look"), consists of a nylon injection molded housing, cast aluminum pivot and metal locking slider. Rigid, taper locking design is activated by single lever that also locks in folded position. They incorporate handles on both sides of table for ease of use is "flipping" tables up and down for storage. Design allows for one person to activate the mechanism.

TABLE TOPS

Table top core is **CARB Compliant** 1.25" particle board. Laminate, wood veneer and phenolic backing are glued with water based adhesives.

EDGE SELECTIONS: ERG offers a wide variety of table top edge materials including PVC, wood, aluminum, resin and laminate.
