Table Tops showing perforated design

FLORIN CLUSTER SPECIFICATIONS

Cluster Seat frames are .75" dia., 14 gauge steel tubing. Table tops are perforated steel. Seats are swivel type with automatic return. Cluster Frames: Florin's 4-Seat Cluster Unit frame and legs are made of 11 gauge tubular steel welded together. Cluster units are standard with four adjustable glides. Base mounts to top with 1/4"-20 machine screws into metal top.

Metal Prep Outdoor: products are prepared and finished to resist rusting, scratching, chipping and fading. All metal products are completely sandblasted, including welded and non-welded areas, for maximum sealant and paint adhesion. A zinc rich, rust resistant sealer is applied to the metal, then a strong, durable polyester epoxy powder coat paint is electrostatically applied and baked on. ERG recommends the use of an outdoor polyester powder coat finish. Choose from 18 recommended outdoor finishes.
